| 170.315(d)(4) Amendments |
| 170.315(d)(5) Automatic access time-out |
| 170.315(d)(6) Emergency access |
| 170.315(d)(7) End-user device encryption |
| 170.315(d)(8) Integrity |
| 170.315(d)(12) Encrypt authentication credentials |
| 170.315(d)(13) Multi-factor authentication |
| 170.315(g)(3) Safety-Enhanced Design |
| 170.315(g)(4) Quality management system |
| 170.315(g)(5) Accessibility-Centered Design |
| 170.315(g)(6) Consolidated CDA creation performance |

Electronic Health Information Export

Patient electronic health information may be exported for an individual patient and/or for a grouping of any or all patients within the system. The export is in an XML format in CCDA architecture. Cantata Health Solutions is committed to continual updates of the format to meet the current HL7 Clinical Document Architecture standards as set forth at: <https://www.hl7.org/implement/standards/>

Additional Software

Criteria requiring Direct Messaging require software from the third-party, UpDox.

Costs:

A software license is required either through an initial license agreement and ongoing maintenance costs or by way of a SaaS model with ongoing subscription costs.

There is a one-time implementation fee for the capabilities required for the criteria outlined in this document. That may be bundled in the subscription fees depending on terms provided with the license.

A client may incur additional costs if it needs to connect with an EHR that does not meet national interoperability standards.

Third party fees related to the criteria listed above apply as described below and would be included in the terms provided with the license to be collected by Cantata Health Solutions.

Criteria requiring Direct messaging use the third-party UpDox and may include per-site one-time and ongoing fees. The fees include Direct Domain Setup, Domain vetting and account setups. Fees start at 2 addresses per site, with additional addresses bundled in packs of 5.

Additional costs may be associated with the third party FDB (First Databank). FDB supplies Cantata Health Solutions customers with the dictionaries which define drug interactions and monograph information. Medication orders are checked against the patient's active medication profile using the FDB drug knowledge database.

American Medical Association fees will apply to the use of CPT® (Current Procedural Terminology) codes.
